Sharpe, R. Bowdler [=Sharpe, Richard Bowdler]

Sharpe, Richard Bowdler (1847–1909; England)
Zoologist. Librarian of the Zoological Society of London, from 1867 to 1872. On the death of George Robert Gray in 1872 Sharpe joined the British Museum as a Senior Assistant in the Department of Zoology, taking charge of the bird collection. Became Assistant Keeper in 1895, remaining there until his death from pneumonia. Founded the British Ornithologists' Club in 1892 and edited its bulletin. Wrote thirteen and a half of the 27 volumes of the *Catalogue of the Birds in the British Museum* (1874–1898). His profession was his hobby, and he worked at it with such

unremitting energy and devotion as to distance all competitors in the amount and quality of the scientific work which he achieved. In his study of the vast collections under his charge he acquired an unrivalled knowledge of the bird-life of the world, estimated to include more than 18,000 species, almost any one of which he could name at sight, except in the case of closely allied forms, which would necessitate comparison with others.

Shaw, George [=Shaw, George Kearsley]

Shaw, George Kearsley (1751–1813; England)
Botanist and zoologist. Educated at Oxford University (Magdalen Hall, B.A. 1769, M.A. 1772). A medical practitioner, he became assistant lecturer in botany at Oxford University in 1786. In 1791 became assistant keeper of the natural history department at the British Museum, and keeper in 1807. Was a co-founder of the Linnean Society in 1788, and became a fellow of the Royal Society in 1789. Published one of the first English descriptions with scientific names of several of the common Australian animals in his *Zoology of New Holland* (1794). Was among the first scientists to examine a platypus and published the first scientific description of it in *The Naturalist's Miscellany* in 1799.

Sibley, Charles G.

Sibley, Charles Gald (1917–1998; USA)
Ornithologist and molecular biologist. Had an immense influence on the scientific classification of birds, initiating work that has substantially altered our understanding of the evolutionary history of modern birds. Developed an interest in hybridization and its implications for evolution and taxonomy and in the early 1960s began to focus on molecular studies: of blood proteins, and then the electrophoresis of egg-white proteins. By the early 1970s was pioneering DNA-DNA hybridization studies, with the aim of discovering, once and for all, the true relationships between the modern orders of birds. These were highly controversial to begin with, and regarded by colleagues as anything from pure snake-oil salesmanship on the one hand to Holy Writ on the other. With the passage of time and ever-improving laboratory methods, the balance of scientific opinion has shifted closer to the latter interpretation, though the picture is by no means clear-cut or simple. In 1990 Sibley was elected President of the International Ornithological Congress. Was also Guggenheim Fellow (1959–1960), Oxford University; Treasurer, American Ornithologists' Union (1953–1962); Secretary-General, 13th International Ornithological Congress (1958–1962); President, American Ornithologists' Union (1986–1988); President, 20th International Ornithological Congress (1986–1990), New Zealand; Member, National Academy of Sciences, USA, elected 1986. Awards included: Brewster Memorial Medal of the American Ornithologists' Union (1971), Daniel Giraud Elliot Medal, National Academy of Sciences, USA (1988) and Alessandro Ghighi Medal, National Institute of Wildlife Biology, Italy (1991).

Singh, A., Kumawat, H., Sharma, G., & Rajpurohit, L. S., 2021. Avian diversity along with Hanuman Langur troops in and around Jodhpur, Rajasthan. Bird-o-soar #66. *Zoo's Print* 36 (1): 10–15.

Singh, Arun [=Singh, Arun Pratap]

Singh, Arun P. [=Singh, Arun Pratap]

Singh, Arun Pratap (1968–; India)
MSc, Zoology (1990). PhD, Forestry, Forest Entomology (2006). Ornithologist. Scientist, Himalayan Forest Research Institute, Shimla, Indian Council of Forestry Research &

Education (ICFRE) (1992-1996); Forest Research Institute, Dehradun, ICFRE (1996-2010); Rain Forest Research Institute, Jorhat, Assam, India, ICFRE (2010-2015); Forest Research Institute Dehradun (2015-). Worked in Forestry & EIA projects in the entire Himalayan region and north-eastern India, and Bhutan. Contributed to the ornithology of this biodiversity hotspot, particularly, the Garhwal Himalaya. Received the Salim Ali National Wildlife Fellowship Award 2001 of the Ministry of Environment, Forests & Climate Change, Govt. of India (2004), for a two-year study on the ecology of woodpeckers in Borer infested Sal forests of Dehradun Valley, western Himalaya. Member, IUCN SSC. Reviewing expert IUCN/BirdLife International Red List of Threatened Species (India) (2017–2021, 2021–2024). Peer reviewer: *Biodiversitas Journal of Biological Diversity*, and *Indian Forester*. Book reviewer: *Frontiers in Forests and Global Change.* Author of several papers.

Sitwell, Sacheverell [=Sitwell, Sir Sacheverell, 6th Baronet]

Sitwell, Sir Sacheverell, 6th Baronet (1897–1988; England)

Writer. Best known as an art critic and writer on architecture, particularly of the baroque style, the younger brother of Edith Sitwell and Osbert Sitwell. Later in life became more reticent about associating himself with the publicity attaching to the Sitwells collectively, preferring to travel and concentrate on writing. Became the 6th Baronet, inheriting the title when Osbert died in 1969. Was made a Companion of Honour in 1984. In WWI served from 1916 in the British Army, with the Grenadier Guards.

Sparrman, A. [=Sparrman Anders Erikson]

Sparrman, Anders Erikson (1748–1820; Sweden)
Naturalist. The son of a clergyman, at the age of nine he enrolled at Uppsala University, beginning medical studies at 14 and becoming one of the outstanding pupils of Linnaeus. In 1765 Sparrman went on a voyage to China as ship's doctor, returning two years later and describing the animals and plants he had encountered. Sailed for the Cape of Good Hope in January 1772 to take up a post as a tutor. When James Cook arrived there later in the year at the start of his second voyage, Sparrman was taken on as assistant naturalist to Johann and Georg Forster. After the voyage he returned to Cape Town in July 1775 and practised medicine, earning enough to finance a journey into the interior. In 1776 he returned to Sweden, where he had been awarded an honorary doctorate in his absence. Was also elected a member of the Royal Swedish Academy of Sciences. Was appointed keeper of the natural historical collections of the Academy of Sciences in 1780, professor of natural history and pharmacology in 1781 and assessor of the Collegium Medicum in 1790. In 1787 took part in an expedition to West Africa, but this was not successful.

Stanford, J. K. [=Stanford, John Keith]

Stanford, John Keith (1892–1971; England)
Writer. Saw action in WWI and WWII, retiring in 1945 as Lieutenant-Colonel. Between the wars was in the Indian Civil Service, for much of the time in Burma. Was one of the pioneers of Burmese ornithology, the other being H. C. Smith. Was also, for a period, Vice-President of the British Ornithologists' Union.

Stevens, H. [=Stevens, Herbert]

Stevens, Herbert (1877–1964; England)
Tea planter in India. Took part in expeditions to China and New Guinea collecting zoological specimens. His birds' egg and nest collections from Assam and Sikkim Himalayas were presented to The Natural History Museum in 1961, while his bird skins went to the Hancock Museum in Newcastle. Through the bequest of his house in Tring, he became a great benefactor of the British Ornithologists' Club.

Stoliczka, F. [=Stoliczka, Dr Ferdinand]

Stoliczka, Dr Ferdinand (1838–1874; Austria)
PhD (1861). Moravian palaeontologist. Traveller, explorer, and collector. Worked in India on palaeontology, geology, and various aspects of zoology, including ornithology, malacology, and herpetology. Corresponded with A. O. Hume. Assistant Superintendent, Geological Survey of India (1862); Joint Curator, Indian Museum (1868); Natural History Secretary, Asiatic Society of Bengal. He was involved in editing the Society's journal. Member of several expeditions across South Asia, including the Second Yarkand Mission (1873–1874). He died of high-altitude sickness in Murgo during an expedition across the Himalayas. Commemorated in eponymous taxa from many phyla.

Strickland, H. E. [=Strickland, Hugh Edwin]

Strickland, Hugh E. [=Strickland, Hugh Edwin]

Strickland, Hugh Edwin (1811–1853; England)
Geologist, ornithologist and systemist. In 1850 was appointed deputy reader in geology at Oxford during the illness of Buckland and in 1852 elected Fellow of the Royal Society. In the following year, after attending the meeting of the British Association at Hull, he went to examine the cuttings on the Manchester Sheffield & Lincolnshire Railway near Retford. There, when on a double track, he stepped out of the way of a goods train and was knocked down and killed by an express coming in the opposite direction. His collection of 6,000 birds went to Cambridge in 1867. Whilst travelling in 1835 he discovered the Olive-tree Warbler on the island of Zante, and the Cinereous Bunting in the vicinity of Izmir in western Turkey.

Stuart Baker, Edward Charles (1864–1944; England)
British naturalist, educated at Trinity College, Stratford-on-Avon. Joined the Indian (Imperial) Police in 1883 serving the first three years in Bengal and the rest of his tenure in Assam. Retired in 1911 as Inspector-General of Police for Eastern Bengal and Assam and returned to England to assume charge of the Port of London Police, which he reorganised and brought up to a high standard of efficiency before his final retirement in 1925. Baker was a prolific writer and his many papers in the *JBNHS*, and other journals record his meticulous observations of Indian avifauna. Best remembered for his illustrated serials on ducks and other sporting birds, which helped popularise the *Journal* among sportsmen and naturalists throughout the country. They were later published by the Society as books. Baker made a large and scientifically invaluable collection of bird skins, from remote parts of the country, many of rare and interesting species then almost unknown ornithologically. Besides skins he assembled a huge collection of birds' eggs, which were collected partly by himself and partly by hired local tribals and his numerous correspondents. He relied perhaps rather too trustingly on the information supplied by his collectors, not always dependable, and this led to errors in his publications detected on a critical examination of his egg collection long after his death. Baker was a great shikari and a good shot with the rifle. Was twice tossed by a gaur, trampled on by a rhinoceros, and lost his left arm in an encounter with a man-eating leopard in Silchar. Despite the loss of one arm he continued to shoot with both shotgun and rifle. An excellent tennis player and a keen rider, he won numerous championships in each sport. With his single hand he was extraordinarily deft and could place a small egg in a box of sand and inscribe it. Indian ornithology is indebted to him for his rich legacy of bird lore.

Sundevall, Carl J. [=Sundevall, Carl Jakob]

Sundevall, Carl Jakob (1801–1875; Sweden)
Zoologist, ornithologist and anatomist. Among the first to develop a phylogeny for the birds based on the muscles of the hip and leg—that contributed to later work by Thomas Huxley. Was also an entomologist and arachnologist. He was Director of the Museum of Stockholm—the arrangement of the contents of this museum was elaborated with great care under his eye. Sundevall visited Kolkata, India, in 1828.

Swainson, William (1789–1855; England)

A very capable zoologist and illustrator whose career suffered from his lack of formal training and his propensity for too wholeheartedly adopting theories of dubious worth. His father had been a fine amateur zoologist (and a founding member of the Linnean Society of London), and early on William Swainson continued the family avocation while earning a paycheck as a civil servant. He then carved out a successful career as a very talented illustrator and lithographer of natural history works and encyclopedias, though what he really wanted was an academic or museum post. These never materialized. Eventually emigrated to New Zealand in the autumn of his years. His lack of greater success can be attributed to a rather too obvious lack of academic polish, and to his adoption of the peculiar quinary system of classification (which isolated his systematic efforts from the mainstream of the time, already dominated by the Linnaean approach).

Taher, S. A. [=Taher, Siraj Ahmed]

Taher, Siraj A. [=Taher, Siraj Ahmed]

Taher, Siraj Ahmed (1942–7.i.2010; India)
Ornithologist from Hyderabad, India. Stalwart of the Birdwatchers' Society of Andhra Pradesh, serving it over two decades in various capacities: Honorary Treasurer, Honorary Secretary (1987–1991), President (1992–2009), and President Emeritus (2009–2010). Represented the Asian Waterfowl Census movement in Andhra Pradesh. Member of Board of Governors of Environmental Protection and Training Research Institute. Catalysed the Telugu translation of Grimmett & Inskipps' *Birds of Southern India* (Helm, 2007): Grimmett, Inskipp & Birdwatchers' Society of Andhra Pradesh, *Dakshina Bharata Pakshilu* (Helm, 2008).

Temminck, Coenraad Jacob (1778–1858; Holland) Aristocrat and zoologist. Was the first director of the National Natural History Museum at Leiden from 1820 until his death. His *Manuel d'ornithologie, ou Tableau systematique des oiseaux qui se trouvent en Europe* (1815) was the standard work on European birds for many years. Inherited a large collection of bird specimens from his father, Jacob Temminck, who was treasurer of the Dutch East India Company. A number of birds and mammals were named for Temminck.

Tennent, Sir James Emerson, 1st Baronet (1804–1869; England)

Politician and traveller. Educated at Trinity College, Dublin, of which he afterwards became LL.D. Took up the cause of Greek independence, and travelled in Greece, publishing a Picture of Greece (1826), Letters from the Aegean (1829), and a History of Modern Greece (1830). Was called to the English bar at Lincoln's Inn in 1831. In this year married the daughter and co-heiress (with her cousin, Robert James Tennent, MP for Belfast, 1848−52) of William Tennent, a wealthy merchant at Belfast, who died of cholera in 1832. By royal licence adopted the name of his wife in addition to his own. Entered parliament in 1832 as member for Belfast. In 1841 became secretary to the India Board, and in 1845 was knighted and appointed colonial secretary of Ceylon, where he remained till 1850. On his return, became member for Lisburn, and under Lord Derby was secretary to the Poor Law Board in 1852. From 1852 till 1867 was permanent secretary to the Board of Trade, and on his retirement received a baronetcy from Lord Palmerston.

Ticehurst, C. B.

Ticehurst, Claud B. [=Ticehurst, Claud Buchanan]

Ticehurst, Claud Buchanan (1881–1941; England)
Ornithologist. Made many trips to Europe, often with J. J. L. Bonhote or Hugh Whistler, observing and collecting birds. During 1917–1920 served as a surgeon with the Army in India and made visits to Basra and Quetta. He was editor of *Ibis* (1931–1941) and author of several books and papers. At the time of his death had been working with Hugh Whistler on a systematic account of the birds of India, Burma and Ceylon. Was the brother of ornithologist Norman Frederick Ticehurst.

Tickell, S. R. [=Tickell, Colonel Samuel Richard]

Tickell, Colonel Samuel Richard (1811–1875; England) British Army Officer, artist, and ornithologist. Posted in various regions in India (Bihar, Orissa, Darjeeling) and Burma [=Myanmar; Tenasserim] (1930s–1940s). He was unable to publish his planned work on the birds and mammals of India, due to his deteriorating eyesight. His papers and paintings are held in the library of the Zoological

Society of London. Norman Boyd Kinnear (q.v.) thought he was 'one of the best field naturalists India has known'.

Troelstra, Anne Sjerp (1939–2019; Holland)

Studied mathematics and physics at the University of Amsterdam. From 1970 to 2000 he was full professor of pure mathematics and foundations of mathematics at the University of Amsterdam. He [was] a member of the Royal Dutch Academy of Arts and Sciences, and a corresponding member of the Bavarian Academy of Sciences. He was interested in botany from an early age, and with others he also discovered and named three new species of bramble. This led to a lasting fascination with the history of biology, especially natural history travel narratives. After his retirement he decided to write about natural history travel narratives, resulting in two popular science books (in Dutch), Tijgers op de Ararat ('Tigers on Mount Ararat', Atlas, 2003) and Kolibries in de Oren ('Hummingbirds in the ears', Atlas, 2009), and an anthology of Dutch natural history travel narratives: Van Spitsbergen naar Suriname (Atlas, 2007).

Hay, Lord Arthur [=Tweeddale, Arthur Marquis of]

Tweeddale, Arthur Marquis of (1824–1878; Scotland) Arthur Hay became the ninth Marquess of Tweeddale, inheriting the title late (1876), formerly being known as Viscount Walden (1862–1876). British Army (1841–1866). Amateur ornithologist and collector. President, Zoological Society of London (1868–?). Had a large private collection of birds, insects, and mammals. He described several new taxa. His nephew was Colonel Robert George Wardlaw Ramsay (q.v.).

Vaurie, C. [=Vaurie, Charles]

Vaurie, Charles (1906–1975; France)
Emigrated to the USA. Dental surgeon by profession. Amateur artist, philatelist, ornithologist, and systematist. Dental Surgeon, University of Pennsylvania (1928). In 1942 became a volunteer in the American Museum of Natural History's Ornithology Department and was a Research Associate by 1946. Quit dentistry entirely in 1956 and joined the staff of AMNH as Assistant Curator, becoming Associate Curator (1967) and Curator (1967–1972). A self-taught artist and draftsman, Vaurie prepared all his own maps. His *Tibet and its birds* was not only a scholarly work, but a labour of love, as he had become fascinated by this remote region while working on his Palaearctic bird faunas. At the time of his death was a member of the Standing Committee on Ornithological Nomenclature of the International Ornithological Congress, and for a time had been its chairman. Before he passed away, he was planning a biography of Allan Hume, but it never saw the light of day.

Vieillot, Louis Jean Pierre (1748–1831; France)
Ornithologist. Described many birds for the first time, especially those he encountered during the time he spent in the West Indies and North America, and 26 genera established by him are still in use. Was one of the first ornithologists to study changes in plumage, and one of the first to study live birds as well as skins. Was in business on the Caribbean Island of San Domingo (Haiti), but was forced to flee to the United States during the French Revolution. During his time there he began studying the birds of the country, and collected material for his *Histoire naturelle des oiseaux de l'Amérique Septentrionale* (1808). Returned to France in 1800 (or 1801), where he obtained a post as a writer on the *Bulletin des Lois*. He continued to write on birds, producing *Histoire naturelle et générale des colibris, oiseaux-mouches, jacamars et promerops* (1802) with illustrations by his friend Jean Baptiste Audebert, followed by *Histoire naturelle des plus beaux oiseaux chanteurs de la zone torride* (1806). In *Analyse d'une nouvelle Ornithologie Elémentaire* (1816) Vieillot set out his system of ornithological classification, which he continued in his contributions to the *Nouveau Dictionaire d'Histoire Naturelle* (1816–1819). In 1820 undertook the continuation of the *Tableau encyclopédique et méthodique*, commenced by Pierre Joseph Bonnaterre in 1790. Went on to write Ornithologie Française (1823-30). Is believed to have died in poverty in Rouen.

Vijayan, V. S. [=Vijayan, Vadayil Sankaran]

Vijayan, Vadayil Sankaran (1945–; India)
Ornithologist, wildlife biologist, environmentalist. Ph.D. student of Dr Sálim Ali. Scientist at Bombay Natural History Society (1969–1990). Founding Director of the Salim Ali Centre for Ornithology and Natural History (1991–2005). Chairman, Salim Ali Foundation. Chairman, Kerala State Biodiversity Board. Contributed in saving Silent Valley, Kerala. Conducted long-term ecological studies under the aegis of BNHS at Keoladeo Ghana National Park, Rajasthan. Awards: Salim Ali-Loke Wan Tho Research Fellowship (1972); Padmanabha Memorial Award (2010). Other interests: Naturopathy and organic farming.

Waddell, Lieutenant Colonel Laurence Austine (1854–1938; Scotland)

Explorer, collector in Tibet, and author. Travelled extensively in India in the 1890s, including Sikkim and areas on the borders of Nepal and Tibet. Stationed in Darjeeling with the British Army, learned the Tibetan language and disguised, slipped secretly into Tibet. Was the cultural consultant on the 1903–1904 British invasion of Tibet led by Col. Sir Francis Edward Younghusband.

Wagler, J. G. [=Wagler, Johann Georg]

Wagler, Johann Georg (1800–1832; Germany)
Herpetologist. Was assistant to Johann Baptist von Spix, and became Director of the Zoological Museum at the University of Munich after Spix's death in 1826. Worked on the extensive collections brought back from Brazil, and wrote *Monographia Psittacorum* (1832), which included descriptions of the blue macaws. Died of an accidental self-inflicted gunshot wound whilst out collecting.

Whistler, H. [=Whistler, Hugh]

Whistler, Hugh (1889–1943; England)
Came to India in the Imperial Police Service and was assigned to the Punjab where he served for 16-odd years in almost every district of the province. A friendship struck up with Dr C. B. Ticehurst while the latter was serving in the Royal Army Medical Corps at Karachi in WWI when Whistler was stationed at Rawalpindi, and the introduction to systematic ornithology and guidance he received from Ticehurst helped him to develop into an expert

ornithologist. After WWI, Millard and two other members of the Bombay Natural History Society approached Whistler to write a popular illustrated work on Indian birds, resulting in the classic Popular handbook on Indian birds. After retirement, settled in Battle (UK), and worked out the collections from the BNHS Survey of the Eastern Ghats, jointly with Ticehurst and Kinnear. Also worked out the bird collections made by the various subsequent regional surveys. Ticehurst and Whistler had jointly begun to write a Handbook of Indian Birds to replace the second edition of the Fauna by Stuart Baker, which had several obvious shortcomings. After the death of Ticehurst (1941), Whistler had hoped to complete the book by himself but unfortunately did not live to finish it. Whistler was a very careful and critical worker…his notebooks, full of measurements, notes on plumage, maps of distribution, etc., were models of their kind. He was always ready to help others, no matter how much trouble it involved…he made beautiful skins…he was a great sportsman, at one time a keen follower to hounds, kept falcons when in India, and was a very fine shot, enjoying the rough shoot and mixed bag.

Wikramanayake, E. B. [=Wikramanayake, Eric Bird]

Wikramanayake, Eric Bird (1899–1985; Sri Lanka) Lawyer, statesman, author, and conservationist. Appointed the Queen's Counsel in 1948. Minister of Justice in the Cabinet of Prime Minister Sir John L. Kotelawela (1953–1956). Joined the Wildlife and Nature Protection Society of Ceylon in 1938, was on its committee for thirty-two years (1951–1983), was elected its President twice, 1954–1956, and 1966–1968, and was made an Honorary Life Member in 1970. He was instrumental in having the Society, till then called the Ceylon Game and Fauna Protection Society, incorporated by Act of Parliament in 1968, as the Wildlife Protection Society of Sri Lanka, and was its first President post incorporation. He was also Chairman of the Ceylon Bird Club, and the Sri Lanka National Section of the ICBP. Yes, his middle name was 'Bird'.

Wilson, James (1805–1860; Scotland)

Businessman, economist, and politician. Founded *The Economist*, the Chartered Bank of India, Australia and China, which merged with Standard Bank in 1969 to form Standard Chartered. Was the financial member of the Council of India (1859), instrumental in establishing the tax structure, a new paper currency, and remodelling India's finance system, however, he died in Calcutta [=Kolkata] in 1860, and is buried there.

Witherby, H. F. [=Witherby, Harry Forbes]

Witherby, Harry Forbes (1873–1943; England)
Ornithologist and author. Founder Editor of *British Birds* (1907). Served in WWI in the Royal Navy Volunteer Reserve, and awarded a Military MBE. He started one of the world's first two bird ringing schemes in 1909, merging and transferring them to the BTO (1937). Honorary Secretary and Treasurer (1904–1914), Chairman (1924–1927) BOU; President of the Council, BOU (1933–1938). One of the original proposers for founding the BTO (1933), its founding member and early vice-chairman. Awarded the Godman-Salvin Medal (1937). Several bird taxa named after him.

Wolters, H. E. [=Wolters, Hans Edmund]

Wolters, Hans Edmund (1915–1991; Germany)
Ornithologist. Appointed curator of birds of the Alexander Koenig Zoological Research Institute and Museum, Bonn, in 1966. In 1973 became head of the Department of Ornithology and between 1974 and 1979 he edited the Institute's journals *Bonner zoologische Beiträge* and *Bonner zoologische Monographien*. Was keenly interested in avian systematics and was among the first Europeans who applied cladistic principles for the reconstruction of avian phylogeny. Was elected member of the Standing Committee on Ornithological Nomenclature of the International Ornithological Committee in 1982, and served until his death.

Yamashina, Yoshimaro [=Yamashina, Marquis Dr Yoshimaro]

Yamashina, Marquis Dr Yoshimaro (1900–1989; Japan) Second son of Prince Kikumaro Yamashina. Ornithologist, and collector. PhD, University of Hokkaido. In 1932 he built a museum in his backyard to house his collection of bird specimens and books. This later became the Yamashina Institute of Ornithology, and moved to larger premises. Awards: Japanese Medal with Purple Ribbon; Jean Delacour Prize (1977); World Wildlife Fund, Order of the Golden Ark (1978). Described several new taxa.
